YOU'VE PACKED: THE USER GUIDE

Everything you need to evolve your club, explained in full

1

PICK

a player

2

TICK

PlayStyles

3

APPLY

& done

WHAT IT DOES

Pick a club player, tick the PlayStyles you want, hit Apply — the tool adds them all for you, one after another, and shows you exactly what landed. It works entirely inside the EA FC web app using your own logged-in session, so there's nothing to sign into and nothing leaves your browser.

1

GETTING STARTED

1

SAVE THE BOOKMARKLET

Add the one line from bookmarklet.txt as a browser bookmark on your address bar or bookmarks bar.

2

OPEN THE EA FC 26 WEB APP

Let the app fully load before clicking the bookmark.

3

CLICK THE BOOKMARK

The panel appears — bottom-right on a computer, or as a sheet from the bottom on a phone. Click it again any time to refresh it.

2

THE GOOD STUFF

01

YOUR WHOLE CLUB, NOT JUST YOUR SQUAD

It loads every player you own — hundreds of cards — so you can evolve anyone, not only your starting XI.

02

INSTANT SEARCH

Start typing a name to filter the list. Players are sorted by rating, best first.

03

SMART SUGGESTIONS

Not sure which PlayStyles suit a player? Pick a position and a role (e.g. RW/LW → Inside Forward) and hit Suggest — it pre-ticks a proven set, with the three best as PlayStyle+.

04

SEE PLAYSTYLE+ AT A GLANCE

Each player in the list shows the PlayStyle+ icons they already have, in gold, right next to their name — spot what a card's got without opening it.

05

A RICH PREVIEW OF ANY PLAYER

Select someone and see their rating, rarity, positions, and two slot meters: 3 for PlayStyle+ (gold) and 8 for Basic (emerald). Current PlayStyles appear as tidy chips.

06

EVO-ELIGIBLE FILTER THAT LEARNS

Only special cards can receive PlayStyles. Flip on Only evo-eligible and the list hides the ones that can't. It learns automatically — every successful apply remembers that card type, so the filter gets smarter the more you use it.

07

BULK APPLY WITH A SATISFYING FINISH

Tick as many PlayStyles as you like (caps: 3 PS+, 8 Basic). Hit Apply and watch each one spin, then stamp a green tick as it lands. A clean summary shows every PlayStyle that went on — nothing silently fails.

08

WORKS ON YOUR PHONE TOO

On a computer it's a wide two-pane workspace. On a phone it becomes a step-by-step flow: pick a player → choose PlayStyles → apply — with big, thumb-friendly buttons.

09

GENTLE AND SAFE

It clicks the game's own buttons and never fakes anything. A delay control keeps applies from firing all at once. Change your mind mid-run? Hit Stop.

10

LOOKS THE PART

An Emerald frosted glass theme that sits nicely over the web app, with the game's own PlayStyle icons throughout.

3

APPLY PLAYSTYLES IN 4 STEPS

1

PICK A PLAYER

Search or scroll the list, then click or tap their row.

2

SUGGEST (OPTIONAL)

Choose a position + role for a recommended set, or just tick your own on the tab grid.

3

TICK THE PLAYSTYLES

Use the PlayStyle+ and PlayStyle tabs. The counter keeps you within the caps and greys out ones the player already has.

4

APPLY

Watch the tiles tick off, then read the summary. Done — the player's card updates without reloading the page.

4

HANDY TO KNOW

- **Nothing to reload after an update.** Clicking the bookmark always loads the latest version and reuses your already-loaded club — instant.
- **The caps are real.** A player can hold at most **3 PlayStyle+** and **8 Basic** PlayStyles — the tool won't let you exceed them.
- **Goalkeepers.** GK-only PlayStyles are shown only when a goalkeeper is selected; hidden for outfielders automatically.
- **A failed apply is sometimes normal.** If a card can't take a particular PlayStyle (already has it, is maxed, or isn't eligible), that one is marked failed and the rest carry on.
- **Your settings stick.** The eligible-card list and the filter toggle are remembered between sessions via localStorage.

ENJOY EVOLVING YOUR CLUB. ■
